SUMMARY

Detail-oriented Software Engineer with full-stack development experience using React, Node.js, FastAPI. Strong foundation in core computer science fundamentals and a passion for building scalable systems, writing clean code, problem-solving, effective team collaboration, and exploring AI and machine learning technologies.

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern, Perago Information Systems 09/2025 – 11/2025 | Addis Ababa, Ethiopia

- Contributed to the development of real-world web applications using Next.js for the frontend and NestJs for the backend, both implemented with TypeScript.
- Built scalable and efficient application features following modern full-stack development practices.
- Collaborated with team members to design, develop, and integrate frontend and backend components.
- Wrote clean, maintainable, and well-structured code, adhering to best practices and project standards.

EDUCATION

BSC in Software Engineering, Addis Ababa University 02/2023 – Present | Addis Ababa, Ethiopia

SKILLS

- | | | | |
|--------------|-----------|-------------------|---------------------------|
| • HTML | • CSS | • Javascript | • Typescript |
| • Python | • Figma | • React | • Next.js |
| • Supabase | • Node.js | • Express.js | • NestJS |
| • PostgreSQL | • MySQL | • MongoDB | • Tailwind CSS |
| • Git | • FastAPI | • Time management | • Effective Communication |
| • Teamwork | | | |

PROJECTS

Research Collaboration App, Tech Stack: Jetpack Compose, NestJS, PostgreSQL, Prisma ORM

- Collaborated with a team of five to develop a mobile application enabling researchers to manage projects and research activities.
- Contributed primarily to backend development, designing RESTful APIs, database schemas, and implementing authentication and role-based authorization.
- Focused on writing clean, scalable backend code and collaborating closely with frontend and mobile developers. Github Repo

Employee Hierarchy Manager, Tech Stack: Next.js, Hono.js, TypeScript, PostgreSQL, Drizzle ORM, Tailwind CSS

- Built a full-stack web application to manage and visualize hierarchical employee positions using a parent-child data model with unlimited depth.
- Implemented tree-based rendering and RESTful APIs for efficient CRUD operations, backed by PostgreSQL and Drizzle ORM.
- Focused on clean UI/UX, scalable architecture, and maintainable TypeScript code. GitHub Repo

Amazon Clone, Tech Stack: React, Firebase, Stripe

- Built a full-stack e-commerce web application with user authentication, product browsing, cart management, and checkout functionalities.
- Developed multiple pages including Home, Product Details, Orders, Checkout, and Signup/Login, with responsive design and smooth user experience.
- Integrated Stripe for secure payment processing and Firebase for backend services and real-time database management. GitHub Repo
